1 1/4 inch x 2 inch

1 1/4 inch x 1 1/2 inch

1 1/2 inch x 2 inch

Who are we and what do we stand for?

We at Dutch Pipe Fittings accumulated solid experience in the production based in the EU but are also importing these products into the EU, already during several decades of doing business with our partners.

We do stock in our warehouse based in the Netherlands; a vast range of pump-sets for the biggest factory of circulation pumps; Grundfos.

We also produce and stock a full range of Barrel nipples in our warehouse based in the Netherlands.

We deliver premium quality and if needed we are able to help to achieve any certificate needed. Let us assist you too!

We successfully passed the certification and quality audit of and for Grundfos in 2020.

What Dutch Pipe Fittings can offer our business partners:

With respect to Barrel nipples we faced extreme rising costs in China and extra taxes from China (90,7% anti dump taxed) we decided to set up a strong co-operation with 3 quality manufacturers located in the Turkish Republic, Romania and Bulgaria.

The overall costs in the 3 countries mentioned are currently less than the costs in China so we are able to offer very competitive prices.

Furthermore we are not dependent of Chinese political instability, sea freight from China and tax instability, i.e. from EU countries and Turkey it is 0% tax and 0% VAT

With respect to pump-sets we are independent from any Chinese factory and joined forces together with a high quality foundry residing in Turkey, resulting in pricing considered to be very competitive!

Delivery is always swift and without hassles.

We at Dutch Pipe Fittings really make connections, you are very welcome and will be served directly in accordance to our high standards that we impose on ourselves so that our customers are satisfied with the high quality and service we provide!

You are welcome to contact us, we will be glad to communicate!
